CERTIFICATE

This document is to certify that **Dr. Hamid Nazari** of the Geological Survey of Iran, who obtained his Ph.D. degree in Active Tectonics and Paleoseismology from the University of Montpellier II in France, has collaborated continuously since 2001 with UK scientists from the Departments of Earth Sciences in the Universities of Cambridge and Oxford. Dr. Nazari has participated as a valued co-researcher in an international partnership between the Universities of Cambridge and Oxford with the Geological Survey of Iran, devoted to a better understanding of earthquake hazard in Iran.

As part of this collaboration, Dr. Nazari spent prolonged periods of time as a post-doctoral researcher at the Bullard Laboratories in the Department of Earth Sciences at the University of Cambridge in 2005, 2007, 2010, 2011, with a total duration of about 10 months. During this time, Dr. Nazari received training in the interpretation and manipulation of satellite imagery, the application of various earth science and map-making software packages to the interpretation of tectonic geomorphology, and also scientific writing. As a result, he contributed substantially to several high-profile publications in professional international journals with high scientific impact.

Professor James Jackson FRS
